

paygate integrates seamlessly with payroll software for a streamlined end-to-end payroll service

paygate is a cloud-based Bacs solution that enables you to submit payments and transaction data for processing quickly, securely, cost-effectively and without Bacs Approved Bureau status or a direct Service User Number.

By extending your payroll service to include Bacs submission, you gain competitive advantage and your customers benefit from the added value of a complete end-to-end process.

Payment files created in your payroll system can be effortlessly uploaded into paygate where they're translated into Bacs-ready transactions. Then, without further risk-prone transfer of files, you can check the contents for errors before securely approving for payment.

# Payroll + paygate: a powerful combination

## Bring payments in-house

With paygate you can perform the tasks you'd usually outsource to a Bureau, cutting the cost, giving you direct access to Bacs and putting you in control. Competitive annual fees, predictable costs and unlimited transactions accommodate business growth.

## Raise the bar of payment security

With no onward transfer of files and audit-friendly action logs, files are secured and protected within paygate, eliminating tampering and corruption risk.

User roles and locked-down workflows control access, visibility and activity of files along the process. User alerts prompt action to evade delays and keep transactions on track.

- No need to become a Bacs Approved Bureau
- No need for a direct Service User Number (SUN)
- Ideal if you're new to Bacs and Faster Payments
- More control of the end-to-end process
- Direct, confidential management of payments
- Faster and more accurate than Internet Banking
- Access Bacs reports as soon as they are available

“Deployed alongside our IRIS system, paygate is a vital part of our service and we would not be as successful as we have been in building our business without it.”

“paygate gives us crucial flexibility in how we operate day to day, it has helped us cut the time to process our submissions by 75%, saving us over £25k each year.”

## Benefits made possible by the cloud

paygate is hosted on UK Tier 4 datacentres and is accessed securely from any mainstream browser. It supports flexible working, enables actions to be taken from any location with ultra-secure approval options, and eliminates the cost of extra disaster recovery provision.

## Driving efficiency for Bacs Approved Bureaux

If you're an approved bureau, paygate's extended range of benefits help you save time, cut cost and reduce risk: workflow automation, unattended payment submissions, direct debit management services and additional secure signing options such as two-factor authentication and SMS.

- Avoids risk-prone transfer of files to third-party Bureau
- Flexible, secure approval options including SMS
- Lower cost v using a third-party bureau
- No transaction limits help you grow your payroll revenue
- Minimal investment, manageable costs and rapid ROI
- Easy to use with minimal training

## Why paygate

- For over 40 years paygate has provided the technology that allows payroll professionals to process direct debit and direct credit submissions securely, efficiently and cost-effectively
- Trusted by internal payroll teams to process their own payment submissions and by outsourced service providers to deliver enhanced services to their clients
- paygate supremely secure solutions and services help organisations around the world simplify and streamline every type of payment

“With its long heritage in providing Bacs solutions, paygate's software gives our clients a great opportunity to extend their service offerings whilst at the same time simplifying and lowering their payment transaction costs.”
